linkedin.com/in/jakubsobiecki

UX/UI designer with 4 years of hands-on experience designing web and mobile interfaces in Figma. Delivered commercial projects - from discovery and wireframes through to a live product - and developed self-initiated case studies to broaden my portfolio. Complementing my design practice with studies in Information Architecture and a working knowledge of digital accessibility (WCAG). Fast learner, comfortable collaborating with developers, and eager to grow within a Scrum environment.

UX/UI Projects

Logafit - website redesign

Commercial project · shipped

2024

- Redesigned an existing website to simplify navigation, improve visual appeal, and implement responsive layouts (RWD)
- Full process: UI audit, wireframes and prototypes in Figma, close collaboration with a full-stack developer
- Outcome: site launched and actively used by end users

Minecraft Server List - web platform

Commercial project · design completed

2023-2024

- Designed UX/UI for a platform allowing server owners to promote their Minecraft servers — information architecture, user flows, component system
- Collaborated with two developers; adapted designs to technical requirements
- Maintained consistent visual identity true to the game's aesthetic while preserving usability principles

Additional projects & case studies

Self-initiated · available at jakubsobiecki.pl

- Independently developed conceptual projects with full case studies covering problem definition, research, and solution

Work Experience

Remote Banking Consultant

Bank Millennium S.A. · fully remote

09.2025 – 04.2026

- Handled inbound customer enquiries across banking products: accounts, loans, credit cards, deposits, and cash loans
- Conducted credit simulations and sold financial products over the phone
- Operated in a highly regulated environment requiring accuracy, compliance awareness, and procedural discipline

Customer Support Consultant (2nd line)

Telbridge Sp. z o.o. Sp.k. (Play project) · fully remote

10.2023 – 06.2025 (with a break)

- Handled escalated customer tickets for Play telecom network via phone, SMS, and email
- Diagnosed issues and coordinated resolutions across internal teams
